Springer

Use the template dedic.tex together with the Springer document class SVMono for monograph-type books or SVMult for contributed volumes to style a quotation or a dedication at the very beginning of your book in the Springer layout

Foreword

Use the template *foreword.tex* together with the Springer document class *SVMono* (monograph-type books) or *SVMult* (edited books) to style your foreword in the Springer layout.

The foreword covers introductory remarks preceding the text of a book that are written by a *person other than the author or editor* of the book. If applicable, the foreword precedes the preface which is written by the author or editor of the book.

Preface

Use the template *preface.tex* together with the Springer document class SVMono (monograph-type books) or SVMult (edited books) to style your preface in the Springer layout.

A preface is a book's preliminary statement, usually written by the *author or editor* of a work, which states its origin, scope, purpose, plan, and intended audience, and which sometimes includes afterthoughts and acknowledgments of assistance.

When written by a person other than the author, it is called a foreword. The preface or foreword is distinct from the introduction, which deals with the subject of the work.

Customarily *acknowledgments* are included as last part of the preface.

Use the template *appendix.tex* together with the Springer document class SVMono (monograph-type books) or SVMult (edited books) to style appendix of your book in the Springer layout.

A.1 Section Heading

Instead of simply listing headings of different levels we recommend to let every heading be followed by at least a short passage of text. Furtheron please use the L^AT_EX automatism for all your cross-references and citations.

A.1.1 Subsection Heading

Instead of simply listing headings of different levels we recommend to let every heading be followed by at least a short passage of text. Furtheron please use the L^AT_EX automatism for all your cross-references and citations as has already been described in Sect. A.1.

For multiline equations we recommend to use the `eqnarray` environment.

$$\begin{array}{l} \mathbf{a} \times \mathbf{b} = \mathbf{c} \\ \mathbf{a} \times \mathbf{b} = \mathbf{c} \end{array} \quad (\text{A.1})$$

A.1.1.1 Subsubsection Heading

1. Phase Heuristic Miner :

$$f = 1/2 = \left(1 - \frac{\sum_i^k = 1n_im_1}{\sum_i^k = 1n_i c_i} + 1/2 \left(\frac{\sum_i^k = 1n_i r_i}{\sum_i^k = 1n_i p_i} \right) \right) \quad (\text{A.2})$$

The formula above is a formula in the phase heuristic miner after performing the event log stage to determine the data to be used.
